Professional Summary

Full-Stack Web Developer with 3+ years of experience in Laravel, VueJS, PHP, and MySQL. Skilled in building scalable web systems for government and private clients, with hands-on experience in database optimization, server configuration, and API integration. Strong background in IT education, mentoring students in programming and software development, showcasing excellent communication and leadership skills.

Work History

2022 – 2025

Web Developer

The Lewis College & JEBIT Solutions
Sorsogon City

- Built Identification & Monitoring System of Travelers for Sorsogon Province using Laravel & VueJS (Capstone Project).
- Developed Procurement System with Document Tracking for Sorsogon City Municipal Hall using Laravel & VueJS, streamlining document workflows.
- Created prototype for CAD Incident Report Tracker using HTML & JavaScript.
- Currently leading development of a Pharmaceutical Inventory System (Laravel, Docker, Postman) for Physics Pharmaceutical (March 2025 – August 2025).
- Regularly met with clients to gather requirements, negotiate deliverables, and ensure alignment with business needs.

2022 – 2025

College Instructor – Information Technology

The Lewis College
Cogon, Sorsogon City

- Taught courses in Python, Web Development, Database Management, and OOP to 100+ students annually.
- Designed lesson plans that integrated real-world projects, enhancing student technical competency.
- Mentored students on software development best practices, improving overall capstone project success rates.
- Served as Capstone Project Adviser for 7 groups (2023–2025), achieving a 100% passing rate in software development projects.

Jan 2025 – May 2025

MIS Staff

The Lewis College
Cogon, Sorsogon City

- Managed student records and official credentials (OTR, Certificates, etc.) using Google Sheets, Docs, and MS Word.
- Streamlined documentation workflows, reducing processing time of student requests.
